Short report

of the

**Short-term research internship opportunities for
junior researchers**

23 January – 7 February

Institute of Clinical Psychology and Psychotherapy, Technische
Universität Dresden, Germany

Aygun Sultanova

February 2016

Introduction

The ECNP Research Internship is a new initiative of ECNP and the ECNP Junior Member Advisory Panel (JMAP) and provides short-term research internship opportunities for junior researchers for two weeks. For 2015 internship program I have been selected by the Educational Committee as a junior researcher at the Institute of Clinical Psychology and Psychotherapy, Technische Universität Dresden, Germany led by Professor Dr. Hans-Ulrich Wittchen.

Internship program

| N | Project |
|----|---|
| 1. | Neuroimaging Center (NIC), observe fMRI Session in Parkinson Study |
| 2. | CELOS center, observe experimental testing in BeMind Study |
| 3. | Protect-AD Laboratory, observe Cue Conditioning and Virtual Reality paradigm testing |
| 4. | Voice cues of emotional arousal in exposure therapy for panic disorder with agoraphobia and how to extract them |
| 5. | Addiction research unit |
| 6. | Eating disorder research unit |

| N | Kolloquium |
|----|--|
| 1. | Prof. Amit Berstein (Haifa, Israel) "Attentional bias in psychopathology vulnerability: translational implications of a dynamic process perspective" |

My Presentation

From Baku to Dresden

Outcomes of the Internship

It was a great pleasure to participate in this project and spend two weeks in Dresden. During the internship program, I had chance to attend and observe different research projects, meetings, presentations, colloquium. To give attention to neurobiological aspects of research was a big chance for me because it is not possible in Azerbaijan. I was also wondering about the observation of a big research projects. Throughout the internship, I communicated with experts in this field and made relationship for future.

Last day I made a presentation “From Baku to Dresden” about Baku, my background, my work in Azerbaijan, scientific activities, goals, practice in Dresden.

Furthermore, I got motivated, met with new friends and enjoyed the beauty of the Dresden.
